# R•E•A•L Opportunities (How we will learn)

## YEAR 1

Biology	Chemistry	Physics
<b>PLANTS 1</b>	<b>EVERYDAY MATERIALS</b>	<b>SEASONAL CHANGES</b>
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify and name a variety of common wild and garden plants, including deciduous and evergreen trees;</li> <li>➤ identify and describe the basic structure of a variety of common flowering plants, including trees.</li> </ul>	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ distinguish between an object and the material from which it is made</li> <li>➤ identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</li> <li>➤ describe the simple physical properties of a variety of everyday materials</li> <li>➤ compare and group together a variety of everyday materials on the basis of their simple physical properties.</li> </ul>	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ observe changes across the four seasons</li> <li>➤ observe and describe weather associated with the seasons and how day length varies.</li> </ul>
<b>ANIMALS INCLUDING HUMANS</b>		
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals</li> <li>➤ identify and name a variety of common animals that are carnivores, herbivores and omnivores Science – key stages 1 &amp; 2</li> </ul> <p><i>P&amp;S: Uses &amp; Abuses: initial discussion of healthy eating, diet and lifestyle surrounding meat, vegetables, sugar etc. Could link to school wide 'healthy eating' focus.</i></p> <ul style="list-style-type: none"> <li>➤ describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)</li> <li>➤ identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</li> </ul>		

# YEAR 2

Biology	Chemistry	Physics
<b>LIVING THINGS AND THEIR HABITATS</b>		<b>USES OF EVERYDAY MATERIALS</b>
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ explore and compare the differences between things that are living, dead, and things that have never been alive</li> <li>➤ identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</li> <li>➤ identify and name a variety of plants and animals in their habitats, including micro-habitats</li> <li>➤ describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.</li> </ul>	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses,</li> <li>➤ find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.</li> </ul>	
<b>PLANTS 2</b>		
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ observe and describe how seeds and bulbs grow into mature plants,</li> <li>➤ find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.</li> </ul>		
<b>ANIMALS INCLUDING HUMANS 2</b>		
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ notice that animals, including humans, have offspring which grow into adults,</li> </ul> <p><i>P&amp;S: Myself &amp; Others human reproduction.</i></p> <ul style="list-style-type: none"> <li>➤ find out about and describe the basic <b>needs</b> of animals, including humans, for survival (water, food and air),</li> </ul> <p><i>P&amp;S Uses &amp; Abuses contrast with <b>wants</b> (sweets, cola, coffee tea) &amp; effect of non-necessary diet.</i></p> <ul style="list-style-type: none"> <li>➤ describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.</li> </ul> <p><i>P&amp;S Staying Safe recapping P&amp;S Staying Safe include basic medicine safety education, oral health and basic personal hygiene e.g. hand washing.</i></p>		

# YEAR 3

Biology	Chemistry	Physics
<p style="text-align: center;"><b>PLANTS 3</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers</li> <li>➤ explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant</li> </ul> <p><i>P&amp;S Community Life Light touch on consequences of crops nutrition, deforestation / oxygenation for humans.</i></p> <ul style="list-style-type: none"> <li>➤ investigate the way in which water is transported within plants.</li> <li>➤ explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.</li> </ul> <p><i>P&amp;S Community Life Light touch on gardens / green spaces and the importance of encouraging pollinators (bees, etc.)</i></p>	<p style="text-align: center;"><b>ROCKS</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ compare and group together different kinds of rocks on the basis of their appearance and simple physical properties</li> <li>➤ describe in simple terms how fossils are formed when things that have lived are trapped within rock,</li> <li>➤ recognise that soils are made from rocks and organic matter.</li> </ul>	<p style="text-align: center;"><b>LIGHT</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ recognise that they need light in order to see things and that dark is the absence of light</li> <li>➤ notice that light is reflected from surfaces</li> <li>➤ recognise that light from the sun can be dangerous and that there are ways to protect their eyes</li> </ul> <p><i>P&amp;S Staying Safe hazards in the home, outdoors and toys</i></p> <ul style="list-style-type: none"> <li>➤ recognise that shadows are formed when the light from a light source is blocked by a solid object</li> <li>➤ find patterns in the way that the size of shadows change.</li> </ul> <p><i>P&amp;S Staying Safe Road Safety, night-visibility, bike lights, reflectors in winter etc.</i></p>
<p style="text-align: center;"><b>ANIMALS INCLUDING HUMANS 3</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat.</li> </ul> <p><i>P&amp;S Uses &amp; Abuses/Healthy Body Healthy Mind: esp. looking at none- or poor-nutritious choices which may do more harm than good (sweets, energy drinks, coke etc.)</i></p> <ul style="list-style-type: none"> <li>➤ identify that humans and some other animals have skeletons and muscles for support, protection and movement.</li> </ul> <p><i>P&amp;S Staying Safe examine damage to bodies, breaks, healing risk etc.</i></p>		<p style="text-align: center;"><b>FORCES AND MAGNETS</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ compare how things move on different surfaces</li> <li>➤ notice that some forces need contact between two objects, but magnetic forces can act at a distance</li> <li>➤ observe how magnets attract or repel each other and attract some materials and not others</li> <li>➤ compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials</li> <li>➤ describe magnets as having two poles</li> <li>➤ predict whether two magnets will attract or repel each other, depending on which poles are facing.</li> </ul>

# YEAR 4

Biology	Chemistry	Physics
<p style="text-align: center;"><b>LIVING THINGS AND THEIR HABITATS 3</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ recognise that living things can be grouped in a variety of ways,</li> <li>➤ explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment,</li> <li>➤ recognise that environments can change and that this can sometimes pose dangers to living things.</li> </ul> <p><i>P&amp;S Community Life in context Humankind's impact on animals habitats e.g. deforestation and children's own responsibilities as future local, national and global citizens.</i></p>	<p style="text-align: center;"><b>STATES OF MATTER</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ compare and group materials together, according to whether they are solids, liquids or gases,</li> <li>➤ observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C),</li> </ul> <p><i>P&amp;S Staying Safe (light touch) contextualise insulation briefly with concept of proper clothes, waterproofs, insulation of bodies etc.</i></p> <ul style="list-style-type: none"> <li>➤ identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.</li> </ul>	<p style="text-align: center;"><b>ELECTRICITY</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify common appliances that run on electricity</li> <li>➤ construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</li> <li>➤ identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery</li> <li>➤ recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit</li> <li>➤ recognise some common conductors and insulators, and associate metals with being good conductors.</li> </ul> <p><i>P&amp;S Staying Safe recapping to ensure children recognise the risks of electricity, electrical devices and hazards in the home.</i></p>
<p style="text-align: center;"><b>ANIMALS INCLUDING HUMANS 4</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ describe the simple functions of the basic parts of the digestive system in humans,</li> </ul> <p><i>P&amp;S Healthy Body, Healthy Mind good diet and the effects of poor diet and the effects of non-required substances on the body (processed sugar, tea, coffee etc.)</i></p> <ul style="list-style-type: none"> <li>➤ identify the different types of teeth in humans and their simple functions,</li> </ul> <p><i>P&amp;S Healthy Body, Healthy Mind including dental health and hygiene; good diet and the effects of poor diet P&amp;S Uses &amp; Abuses. Examining the effect of sugar, coffee, energy drinks, etc. on teeth.</i></p> <ul style="list-style-type: none"> <li>➤ construct and interpret a variety of food chains, identifying producers, predators and prey.</li> </ul>		<p style="text-align: center;"><b>SOUND</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify how sounds are made, associating some of them with something vibrating</li> <li>➤ recognise that vibrations from sounds travel through a medium to the ear,</li> <li>➤ find patterns between the pitch of a sound and features of the object that produced it,</li> <li>➤ find patterns between the volume of a sound and the strength of the vibrations that produced it,</li> <li>➤ recognise that sounds get fainter as the distance from the sound source increases.</li> </ul>

# YEAR 5

Biology	Chemistry	Physics
<b>LIVING THINGS AND THEIR HABITATS 4</b>	<b>PROPERTIES AND CHANGES OF MATERIALS</b>	<b>EARTH AND SPACE</b>
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird</li> </ul> <p><i>P&amp;S Myself &amp; Others sexual reproduction relating mammal to human.</i></p> <ul style="list-style-type: none"> <li>➤ describe the life process of reproduction in some plants and animals.</li> </ul> <p><i>P&amp;S Myself &amp; Others sexual reproduction contextualised to non-detailed human reproduction.</i></p>	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets,</li> <li>➤ know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution,</li> <li>➤ use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating,</li> <li>➤ give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic,</li> <li>➤ demonstrate that dissolving, mixing and changes of state are reversible changes,</li> <li>➤ explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.</li> </ul>	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ describe the movement of the Earth, and other planets, relative to the Sun in the solar system</li> <li>➤ describe the movement of the Moon relative to the Earth</li> <li>➤ describe the Sun, Earth and Moon as approximately spherical bodies</li> <li>➤ use the idea of the Earth’s rotation to explain day and night and the apparent movement of the sun across the sky.</li> </ul>
<b>ANIMALS INCLUDING HUMANS 4</b>		<b>FORCES</b>
<p>Pupils should be taught to:</p> <p style="padding-left: 40px;">describe the changes as humans develop to old age.</p> <p><i>P&amp;S Myself &amp; Others including hormonal, emotional and mental changes (including hygiene, deodorant etc.)</i></p> <p><i>P&amp;S Healthy Body, Healthy Mind including worries about change, the “normality” of change, weight gain, weight loss, body image, etc. changes in mood and maturity etc.</i></p>		<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</li> <li>➤ identify the effects of air resistance, water resistance and friction, that act between moving surfaces</li> <li>➤ recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.</li> </ul>

# YEAR 6

Biology	Chemistry	Physics
<b>LIVING THINGS AND THEIR HABITATS 5</b>		<b>LIGHT 2</b>
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals,</li> <li>➤ give reasons for classifying plants and animals based on specific characteristics.</li> </ul>		<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ recognise that light appears to travel in straight lines</li> <li>➤ use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye</li> <li>➤ explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes</li> <li>➤ use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.</li> </ul>
<b>ANIMALS, INCLUDING HUMANS</b>		<b>ELECTRICITY 2</b>
<p>pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood,</li> </ul> <p><i>P&amp;S Uses &amp; Abuses; Healthy Body, Healthy Mind recognise the impact of diet, exercise, drugs (incl. caffeine) and lifestyle choices (smoking, exercise) on the way their bodies function, incl. social aspect, peer pressure etc.</i></p> <ul style="list-style-type: none"> <li>➤ describe the ways in which nutrients and water are transported within animals, including humans.</li> </ul> <p><i>P&amp;S Healthy Body, Healthy Mind; Uses &amp; Abuses including water content of "drinks": tea, coffee, fizzy drinks, alcohol, diuretic effects, dehydration and the effects of alcohol on the brain/liver etc.</i></p>		<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit</li> </ul> <p><i>P&amp;S Community Life contextualises the use of electricity with emissions, carbon footprint and effect on the environment, esp. in relation to brightness/wattage of bulbs.</i></p> <ul style="list-style-type: none"> <li>➤ compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches</li> <li>➤ use recognised symbols when representing a simple circuit in a diagram.</li> </ul> <p><i>P&amp;S Staying Safe recapping to ensure children recognise the risks of electricity, electrical devices and hazards in the home.</i></p>
<b>EVOLUTION AND INHERITANCE</b>		
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>➤ recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago,</li> <li>➤ recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents,</li> </ul> <p><i>P&amp;S Myself &amp; Others including more detail on human reproduction, puberty &amp; P&amp;S Healthy Body, Healthy Mind incl. social aspect, peer pressure etc. associated mental and emotional feelings, privacy, secrets, good touch/bad touch etc.</i></p> <ul style="list-style-type: none"> <li>➤ identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</li> </ul>		

Cross-Curricular Learning

<p><b>ART &amp; DESIGN:</b> Scientific method ought to be applied to the mixing of paints and pigments and the exploration of new media. Scientific enquiry with for instance, charcoal might ask <i>how can I make the lightest/darkest possible marks with this medium?</i> Recording, analysing and evaluating the results.</p>	<p><b>COMPUTING:</b> This is in itself a science but the widest possible use should be made of software, websites and apps to further the science knowledge and develop experimental skills.</p> <p>In particular, virtual models, data loggers and abstractions should be used to deepen children’s understanding of science.</p>	<p><b>DANCE:</b> Dance is an exploration both the art of movement, and the possibilities of the human body. Every chance should be taken to discuss fitness, flexibility, motion, anatomy and physiology during dance, relating it to studies of motion, forces, gravity, health, exercise and the human body.</p>	<p><b>DESIGN &amp; TECHNOLOGY:</b> The iterative nature of D&amp;T means that designs should be researched, data gathered, findings analysed and products tested. Testing should be fair and thorough and lead to simplifications, streamlines and improvements. This is a perfect opportunity to develop scientific method and enquiry.</p>
<p><b>GEOGRAPHY:</b> Geography is the chance to take science into the environment and tests rocks, soils, the weather and naturally occurring materials and chemicals. There are ample opportunities to gather, compare, analyse and evaluate real data, drawing scientific conclusions.</p>	<p><b>HISTORY:</b> A concept of change over time is key in science, e.g. geological time and the intervals between certain discoveries and beliefs. For how long have we believed the earth orbits the sun and how long is a nanosecond? The history of science and scientists will bring science into focus for children. What impact did certain world events have on science and scientists? E.g. the 2<sup>nd</sup> World War?</p>	<p><b>LANGUAGES:</b> There is the opportunity to learn about German scientists, contextualised in the history of ideas, pronouncing, writing and spelling their names and discoveries to broaden the opportunities to experience the language and ideas of the culture.</p>	<p><b>MATHEMATICS:</b> Maths underpins science and provides its foundation. Science at Stanley Road needs to build rigorous measurement, calculation and problem solving in the context of scientific enquiry with science lessons facilitating age-appropriate, challenging maths and it not being “good science” without “good maths” to support it.</p>
<p><b>MUSIC:</b> A great deal of learning in the music curriculum is about testing “what happens if I...” or analysis “what can I hear...?” both of which are scientific disciplines. Music is also a way into the world of sound, acoustics, the ear and the mystery of the mind.</p>	<p><b>PHILOSOPHY:</b> Epistemology (how can we know or prove anything?) must underpin science’s certainties and metaphysics (what is real? – what exists?) should contextualise science’s hard facts. Time – space – life – death – all of sciences big answers are philosophy’s big questions.</p>	<p><b>PHYSICAL EDUCATION:</b> PE is concerned with what the human body is capable of. It should be well-structured with measuring performance, improvements to resting and active pulse, warm-ups, recovery time, personal bests, data spreads etc. “If this ball is twice as heavy will it on average only travel half as far?”</p>	<p><b>SMSC:</b> The ethics and responsibilities of science need to be at the heart of the REAL science curriculum. Religious and beliefs which are challenged by science must be discussed sensitively, and the impact of science on the world (animal testing, atomic power, pollution etc.) needs to be addressed.</p>

## Entitlements

Children will have the most practical science experience possible. In the REAL curriculum we will prize primary sources (feeling, touching, experimenting, testing) over secondary sources, (pictures, text, research, yet combine the two to ensure a deep and broad understanding of science.

We stand by the maxim:

“Don’t **tell** me if you can **show** me, don’t show me if I can **discover** for myself!”

Children will be given the opportunity to explore science in a cross curricular way and will engage in field work to observe science in the wider world and gather real data to inform their studies.

# R•E•A•L Objectives (What we will learn to do)

Children should learn:

To record	To select	To research	To enquire	To classify
using	using	using	analysis	analysis
Children will develop accurate methods of recording their learning, their findings and expressing data.	Children will learn to use and apply a growing range of scientific equipment, aiming at increasing accuracy and efficiency.	Children will develop scientific knowledge, skills and understanding using primary and secondary sources for information retrieval.	Children will develop their sense of curiosity into an organised mode of enquiry, asking and answering questions about the world.	Children will look for patterns, trends and anomalies in scientific data, using a growing range of models to group, sort and taxonomise.

To test	To respect	To draw conclusions	To troubleshoot	To design
analysis	evaluating	evaluating	evaluating	creating
Children will develop the skills to test hypotheses and assumptions, identifying and controlling variables with increasing efficiency and working methodically.	Children will develop an awareness of the hazards of scientific enquiry, assessing risks whilst respecting the safety and dignity of themselves and their peers.	Children will make judgements on the success of scientific method, interpreting results and suggesting improvements to their own and others' work.	Children will identify problems, limitations and anomalies, seeking solutions and fixing weak logic, inaccurate use of equipment and poor scientific method.	Children use vision and imagination to develop their own tests, experiments and lines of enquiry, discussing, planning and writing creatively.

# R•E•A•L Outcomes (What will learning look like in science?)

## The Depth & Breadth Assessment Model: Points System

Phase 1						Phase 2						Phase 3					
Year 1			Year 2			Year 3			Year 4			Year 5			Year 6		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Surface Learning			Enhanced Learning			Surface Learning			Enhanced Learning			Surface Learning			Enhanced Learning		
			Deep Learning						Deep Learning						Deep Learning		

We are assessing not just the amount that children learn, but the **depth** and **breadth** of their learning. We want to monitor how well a child understands a concept and how useful that learning becomes. Progress in the D&B model should be a widening cone shape, from shallow, surface-level learning, to an enhanced understanding then beyond, into deep, useful, thoughtful ownership.

We chart children's understanding on this continuum, giving them a numerical score, based on averages. This is their attainment. The difference in *attainment* from one assessment to the next is their *progress*. The combination of both in a broad picture is their *achievement*.

With support and modelling	With modelling	Independently
Children attempt and complete learning after concepts and skills are clearly demonstrated. They make mistakes, are assisted and use consistent and continuing feedback to improve during the process.	Children attempt and complete learning after concepts and skills are clearly demonstrated. They work collaboratively or unaided, needing formative feedback, demonstrating maturing skills and concepts.	Children attempt and complete work confidently and independently, in collaboration or alone. They are largely unaided with minimum scaffolding and are demonstrating embedded skills and concepts.

# PHASE 1

Depth of Learning		Stage of Teaching		Breadth of Learning						
				To record	To select	To research	To enquire	To classify		
				using	using	using	analysing	analysing		
1	Surface Learning	Aut	Year 1	<p><b>To record:</b> With support and modelling children communicate their observations using simple labelled drawings and sorting hoops.</p>	<p><b>To select:</b> With support and modelling I can use non-standard units to measure.</p>	<p><b>To research:</b> With support and modelling I can use a range of simple written and visual sources to retrieve basic scientific information. <i>[Phonic-based reference books, KS1 appropriate websites and early primary apps]</i></p>	<p><b>To enquire:</b> With support and modelling I develop and articulate <i>why?</i> and <i>how?</i> questions.</p>	<p><b>To classify:</b> With support and modelling I identify simple patterns in the natural world and built environment. <b>To classify:</b> With support and modelling I can sort objects and materials by a single criterion. ["These are the heavy items, these the light"]</p>		
				2	Spr	<p><b>To record:</b> With modelling children communicate their observations using simple labelled and captioned drawings.</p> <p><b>To record:</b> With support and modelling I can show change over time (before and after) in my recording.</p>	<p><b>To select:</b> With support and modelling I use equipment from a narrow range suggested by my teacher. (ruler, pooter, magnifying glass, hoops,</p> <p><b>To select:</b> With modelling I can use and suggest non-standard units to measure.</p>	<p><b>To research:</b> With modelling I can use a range of simple written and visual sources to retrieve basic scientific information, accessing simple contents pages, indices, glossaries and insets.</p>	<p><b>To enquire:</b> With modelling I develop and articulate and answer <i>why?</i> and <i>how?</i> Questions, verbally and in writing.</p>	<p><b>To classify:</b> With modelling I identify and discuss simple patterns in the natural world and built environment. <b>To classify:</b> With modelling I can sort objects and materials by a single criterion, suggesting other possible criteria. ["These are the red leaves, these are the green. We could have done big and small leaves, or holey and not holey!"]</p>
						3	Sum	<p><b>To record:</b> I can confidently record what I have observed or discovered in and sorting hoops, simple labelled and captioned drawings and written work.</p> <p><b>To record:</b> I can independently record simple changes in pictures and writing.</p>	<p><b>To select:</b> I independently can use non-standard units to measure with growing accuracy.</p> <p><b>To select:</b> With support I can explore new equipment and suggest a use for it.</p>	<p><b>To research:</b> I independently use a range of supervised simple written and visual sources to retrieve basic scientific information, accessing simple contents pages, indices, glossaries and insets.</p>
4	Enhanced Learning	Aut	Year 2	<p><b>To record:</b> With support and modelling I can populate a table, graph or chart which has been supplied to me.</p> <p><b>To record:</b> With support and modelling I can label a diagram to accompany my writing or learning, using simple but appropriate scientific vocabulary. <i>[A Fox diagram labelled brush, fangs, fur.]</i></p> <p><b>To record:</b> With support and modelling I can begin to record change over time as a sequence of events (e.g. a bean diary).</p>	<p><b>To select:</b> With support and modelling I begin to suggest suitable non-standard equipment.</p> <p><b>To record:</b> With support and modelling I can select the correct measuring equipment (scales, balances, ruler, stopwatch) for the right job.</p>	<p><b>To research:</b> With support and modelling I can use age-appropriate reference books to answer my own scientific questions, orienting myself with the glossary, contents, index and page layout.</p>	<p><b>To enquire:</b> With support and modelling I explore "<i>what if?</i>" questions. ["What if we watered it, but only a bit of water, every day!"] <b>To enquire:</b> With support and modelling I notice links between cause and effect.</p>	<p><b>To classify:</b> With support and modelling I can sort objects and materials by two criteria. ["These are the big heavy items, these small heavy, these are the big, light, these are the small light"] <b>To classify:</b> I independently identify and discuss more complex patterns in the natural world and built environment.</p>		
				5	Spr	<p><b>To record:</b> With modelling I can populate a table, graph or chart which has been supplied to me, using my own data.</p> <p><b>To record:</b> With modelling I can label a diagram to accompany my writing or learning, using simple but appropriate scientific vocabulary.</p> <p><b>To record:</b> With modelling I can record observed change over time as a sequence of events (e.g. a bean diary), as illustrated writing.</p>	<p><b>To select:</b> With support and modelling I begin to suggest suitable non-standard equipment.</p> <p><b>To select:</b> With modelling I can suggest non-standard units to measure with growing accuracy and explore measuring in cm/m, g/kg and ml/l secs/mins, with developing efficiency.</p> <p><b>To select:</b> With modelling I can select the correct measuring equipment (scales, balances, ruler, stopwatch) for the right job.</p>	<p><b>To research:</b> With modelling I can use age-appropriate reference books to answer my own and others' questions, orienting myself with the glossary, contents, index and page layout.</p>	<p><b>To enquire:</b> With modelling I explore "<i>what if?</i>" questions. ["What if I put two batteries on instead on one - wow! That's bright. Do three!"] <b>To enquire:</b> With modelling I notice and describe links between cause and effect. ["I think double the battery means double the energy, so that gave double the light."]</p>	<p><b>To classify:</b> With modelling I can sort objects and materials by two criteria. <b>To classify:</b> With modelling I identify and discuss more complex patterns in the natural world and built environment ["When we listened to the birds singing we found lots of them repeated themselves!"]</p>
						6	Sum	<p><b>To record:</b> I can independently populate a table, graph or chart which has been supplied for me.</p> <p><b>To record:</b> I can independently draw and label a diagram to accompany my writing or learning, using simple but appropriate scientific vocabulary.</p> <p><b>To record:</b> I can confidently record observed change over time as a sequence of events (e.g. changing shadows) in illustrated, structured writing.</p>	<p><b>To select:</b> I can select and use a range of simple scientific tools (beakers, pooter, camera, magnifying glass, ruler etc.) independently, effectively and accurately.</p> <p><b>To record:</b> I can select the correct simple measuring equipment (scales, balances, ruler, stopwatch) for the right job.</p>	<p><b>To research:</b> I confidently use age-appropriate reference books to answer my own and others' questions, orienting myself with the glossary, contents, index and page layout.</p>

# PHASE 1

Depth of Learning		Stage of Teaching		Breadth of Learning

				analysing	analysing	evaluating	evaluating	evaluating	creating
1	Surface Learning	Aut	Year 1	<p><b>To test:</b> With support and modelling I investigate simple variables to change and measure their effect.</p>	<p><b>To respect:</b> with support and modelling I am aware of basic hygiene, washing hands after handling equipment and substance and keeping such items out of my mouth. <b>To respect:</b> With support and modelling I follow basic safety guidelines when using sharp or fragile equipment.</p>	<p><b>To draw conclusions:</b> With support and modelling I can describe what happened in the results of experiments. <b>To draw conclusions:</b> With support and modelling I begin to give an opinion about the results of experiments or new scientific knowledge.</p>	<p><b>To troubleshoot:</b> With support and modelling I can discuss on a basic level my own basic practical errors during scientific processes. ["I spilled some as it went in"]</p>	<p><b>To design:</b> With support and modelling I can decide what to observe in an experiment and predict a result.</p>	
				2	<p><b>To test:</b> With modelling I investigate simple variables to change and measure their effect.</p>	<p><b>To respect:</b> with modelling I am aware of basic hygiene, washing hands after handling equipment and substance and keeping such items out of my mouth. <b>To respect:</b> With modelling I follow basic safety guidelines when using sharp or fragile equipment.</p>	<p><b>To draw conclusions:</b> With modelling I can describe what happened in the results of experiments. <b>To draw conclusions:</b> With modelling I can give an opinion about the results of experiments or new scientific knowledge.</p>	<p><b>To troubleshoot:</b> With support and modelling I can discuss on a basic level my own errors during scientific processes, and suggest basic improvements. ["My hand wobbled. I'm going to pour the next one more carefully."]</p>	<p><b>To design:</b> I can decide what to observe in an experiment and predict a result.</p>
				3	<p><b>To test:</b> I can begin to independently discuss changes to simple variables to change and measure their effect. ["e.g. let's put one in the dark and one in the light to see what happens."]</p>	<p><b>To respect:</b> I am aware of basic hygiene, independently washing hands after handling equipment and substance and voluntarily keeping such items out of my mouth. <b>To respect:</b> With modelling I follow basic safety guidelines when using sharp or fragile equipment and report accidents independently.</p>	<p><b>To draw conclusions:</b> I can describe what happened in the results of experiments using simple scientific language (names of equipment etc.) <b>To draw conclusions:</b> I can give an opinion about the results of experiments or new scientific knowledge. ["It looks like the dye went inside the plant and came out in the petals!"]</p>	<p><b>To troubleshoot:</b> I can discuss on a basic level my own errors during scientific processes, and suggest basic improvements, describing if these were effective. ["I kept my eye on the spout and didn't spill any this time!"]</p>	<p><b>To design:</b> With modelling I can decide what to observe in an experiment and predict a result.</p>
4	Enhanced Learning	Aut	Year 2	<p><b>To test:</b> With support and modelling I begin to suggest and identify simple variables to change and measure.</p>	<p><b>To respect:</b> With support and modelling I can give basic hygiene and safety advice, working safely and scientifically with a partner. ["Can you cut there? Watch your fingers"] <b>To respect:</b> With support and modelling I relate my science learning to risks in the wider world, including e-safety.</p>	<p><b>To draw conclusions:</b> With support and modelling I talk about whether an information source was useful. <b>To draw conclusions:</b> With support and modelling I give an opinion about my own results and findings.</p>	<p><b>To troubleshoot:</b> With support and modelling I can discuss my own and others' practical errors during scientific processes, suggesting an improvement. <b>To troubleshoot:</b> With support and modelling I can identify wrong or inaccurate facts and data in my own recording.</p>	<p><b>To design:</b> With support and modelling I can suggest which variables to change and measure, predicting the results. <b>To design:</b> With support and modelling I can design a very basic test or experiment in words and pictures.</p>	
				5	<p><b>To test:</b> With modelling I begin to suggest and identify simple variables to change and measure.</p>	<p><b>To respect:</b> With modelling I can give basic hygiene and safety advice, working safely and scientifically with a partner. <b>To respect:</b> With modelling I relate my science learning to risks in the wider world, including e-safety. ["This bulb won't burn but the one in my bedroom will, so I'll practice handling it carefully."]</p>	<p><b>To draw conclusions:</b> With support and modelling I talk about whether an information source was useful. ["I looked in this book "mini-bugs" but it was just about gardens, not house insects!"] <b>To draw conclusions:</b> With support and modelling I give an opinion about my own results and findings.</p>	<p><b>To troubleshoot:</b> With modelling I can discuss my own and others' practical errors during scientific processes, suggesting an improvement. <b>To troubleshoot:</b> With modelling I can identify wrong or inaccurate facts and data in my own recording. ["that should be 30, not 13!"]</p>	<p><b>To design:</b> With modelling I can suggest which variables to change and measure, predicting the results. <b>To design:</b> With modelling I can design a very basic test or experiment in words and pictures.</p>
6	Deep Learning	Sum		<p><b>To test:</b> I begin to suggest and identify simple variables to change and measure. ["We could give it light, but what about red light, miss?"]</p>	<p><b>To respect:</b> Independently and in collaboration I use basic sharp and fragile equipment safely, offering advice and support. ["Pour carefully, mate, you'll spill it. Miss, can we have a paper towel, there's a drip of ink."] <b>To respect:</b> I describe the risks of scientific concepts in the wider world, including e-safety. [e.g. "Mrs B - have you asked your mum if you can use the internet - is the safe thingy on?"]</p>	<p><b>To draw conclusions:</b> With support and modelling I talk about whether an information source was useful. <b>To draw conclusions:</b> With support and modelling I give an opinion about my own results and findings. ["Well, we found that hot water melts (sizz) sugar faster than cold water, so maybe it's the temperature doing it?"]</p>	<p><b>To troubleshoot:</b> I reflect on my practical technique, identifying strengths and weaknesses and describing improvements. ["I find sucking in through the pooter hard - I'm scared of eating a centipede. Faizaan told me to suck gently and I'm better at it now.] <b>To troubleshoot:</b> I revise my recording spotting and correcting basic scientific mistakes.</p>	<p><b>To design:</b> I can suggest which variables to change and measure, predicting the results. <b>To design:</b> I can design a very basic test or experiment in words and pictures.</p>
