Dear parent/carer,

As part of the Key Stage 2 Science curriculum and the school's Personal and Social provision, the Year 6 children will be learning about human reproduction on 11th July.

This lesson, which will include revisiting the human lifecycle and the physical changes that happen during puberty, will be delivered by school staff. The children will be split into boy/girl classes for this lesson. The boys will be taught by male staff members and the girls by female staff member. The aim of this session is to further their learning in Science on the lifecycle of a mammal and how they reproduce. It is also to give them a basic knowledge of human reproduction before they enter secondary school, where learning about human reproduction is compulsory.

We understand that this can be a difficult subject, so if you would like more information or to view the materials used, please phone or email the office to arrange a meeting and we will be happy to answer any queries. We are also available to offer support and guidance on discussing puberty and human reproduction with your children. You do have the right to withdraw your children from this session, however we request that you discuss your decision with school before confirming.

Yours sincerely,

N.French and C. Alviti
Year 6 teachers
